

How BeautiFAI Works

A simple, guided flow from photo to a detailed report. Choose your AI model, shopping country, and whether to save results for progress tracking.

1

1) Get started and add a photo

Click “Get Started Now”, then upload an image, capture a photo, or take a selfie. Use good lighting and a clear, high-quality photo for best results.

2

2) Choose your analysis options

Pick the AI model (Auto, Google Gemini AI, OpenAI, or both for comparison). Select your country for local Amazon links, and choose whether to save results for future comparisons.

3

3) Analyze, review results, and download

Tap “Analyze Now” to generate a detailed report: primary observations, other possible findings, detected features, a gentle care plan, extra tips, and product recommendations with Amazon links based on your country.

What you'll receive

- Primary skin observations and other possible findings
- A gentle, personalized beauty care plan
- Recommended beauty products with direct Amazon links (based on selected country)
- Detected features and in-depth analysis
- Extra skincare tips

Download your report

You can download and share this guide as a PDF. (Your analysis report download remains available inside the analysis flow.)

Data privacy and security

We store data only if you explicitly consent. Stored data is encrypted. You can compare past and current analyses to track progress over time. BeautiFAI is GDPR-compliant and ISO 27001-certified & SNA, and you stay in control of your data at all times.
